THE PRACTICAL MANAGEMENT OF COPD IN PHARMACY

Presented by Michael Boivin, RPh, CDE, CTE, CTH

Learn how to practically intervene with your patients with COPD to support optimal management and improve quality of life. After watching this on-demand webinar, you will be better able to:

- Screen patients with risk factors and symptoms that may indicate COPD
- Initiate and educate patients on guideline-recommended treatment options, including triple therapy
- Monitor and screen patients with COPD
- Work collaboratively with other clinicians to optimize patients' goals and outcomes
