Quick Wins for COPD: Pharmacist Strategies for Effective Management

By **Michaël Boivin, Bsc. Phm, RPH, CDE**

Upon successful completion of this continuing education lesson, you will be better able to:

1. Describe the key recommendations from the Canadian Thoracic Society (CTS) guidelines for COPD management.
2. Determine interventions the pharmacist can implement to improve outcomes in patients with COPD.
3. Explain the impact of acute exacerbations on mortality and morbidity.
4. Apply current guideline recommendations to reduce exacerbation risk in patients with COPD seen in pharmacy practice.
