**Patient Support Program**

Download the enrollment form to help patients get started with BRENZYS®

BRENZYS® (etanercept injection) is indicated for the treatment of moderately to severely active rheumatoid arthritis (RA) in adults. Treatment is effective in reducing the signs and symptoms of RA, inducing major clinical response, inhibiting the progression of structural damage, and improving physical function. BRENZYS® can be initiated in combination with methotrexate (MTX) in adult patients or used alone.<sup>2</sup>

Refer to the Product Monograph for the full list of indications.

Consult the Product Monograph at [www.organon.com/canada-en/brenzys-pm\\_e](http://www.organon.com/canada-en/brenzys-pm_e) for contraindications, warnings, precautions, adverse reactions, interactions, dosing, and conditions of clinical use. The product monograph is also available by calling 1-844-820-5468.

† Comparative clinical significance has not been established.
