

CAMBIA DOSING

- CAMBIA is a nonsteroidal anti-inflammatory drug (NSAID) used to treat migraine attacks
- CAMBIA is diclofenac potassium powder for oral solution
- Open one individual dose sachet when ready to use at any time during a migraine attack
- Taking CAMBIA with a meal may delay pain relief; however, food may reduce possible stomach and intestinal side effects
- Use only a single dose of CAMBIA to treat one migraine attack*

1

Open 1 sachet of CAMBIA

2

Completely dissolve (mix) in 30 to 60 mL of water

3

Drink the solution immediately after mixing

*Do not use CAMBIA continuously to prevent or reduce the number of migraines you experience. CAMBIA should not be used to relieve pain other than that associated with migraine.

Take CAMBIA only as directed by your doctor. Do NOT take more of it, do NOT take it more often and do NOT take it for a longer period of time than your doctor recommended. If possible, you should take this medication for the shortest time period.

This medication has been prescribed specifically for you. Do NOT give it to anyone else. It may harm them, even if their symptoms seem to be similar to yours.

Please refer to the Patient Information leaflet, which you have received with your medication, for important information regarding when not to use, warnings, precautions, drug interactions and side effects.
