

Are your patients on specialty or biologic medications?

Our program

- Designed to provide integrated care to help patients access and adhere to their specialty medications
- If requested, available reimbursement specialists can work with your team and patients to navigate insurance coverage and financial assistance program
- All specialty or biologic medications are supported
- Medication must be dispensed through our Innomar Pharmacy™ network

Our clinics and nurses

- **InnomarClinics™**: Owned and operated network of specialty injection and infusion clinics located throughout Canada. See our website for locations
- Our nurses are expertly trained, certified and experienced with specialty medications and their administration
- Our main focus is to provide safe and high-quality professional nursing practices tailored to each patient

Our pharmacy

- **Innomar Pharmacy™**: Network of specialty pharmacies dedicated to specialty medications and their proper storage, handling and preparation
- Pharmacy staff is trained and experienced for professional and knowledgeable patient consultation
- Pharmacy dispensing and distribution is directly integrated with our program to ensure medications are delivered on-time for treatment appointments
- Validated cold-chain handling and storage processes to ensure full product integrity
